PROFESSIONAL SUMMARY

Full-Stack Developer with 2+ years of experience building scalable React/Next.js & Tailwind frontends and Node.js/Express backends with MongoDB and Supabase. Experienced with REST, real-time features, CI/CD, n8n automations, and delivering production-ready solutions in remote, agile teams.

PROFESSIONAL EXPERIENCE

Full-Stack Developer – 2N Consulting Group

10/2024 – 02/2025 · Remote

- Engineered scalable full-stack features using React, Node.js, MongoDB, and Supabase, improving API response times by ~30%.
- Migrated legacy systems to a modern stack, enhancing security, maintainability, and overall performance.
- Collaborated with remote, cross-functional teams to improve workflows, code quality, and release reliability.

Developer (Internship) – Dollarro

10/2023 – 04/2024 · Poland (Remote)

- Developed and deployed web applications using Microsoft Azure and .NET, focusing on robustness and security.
- Optimized backend processes, reducing server response times and improving efficiency.
- Delivered client-centric solutions by collaborating effectively with distributed teams over Microsoft Teams.
- Implemented security best practices, strengthening data integrity and reducing vulnerabilities.

EDUCATION

Bachelor of Science in Software Engineering – Riphah International University

10/2020 – 07/2024 · CGPA: 3.43

Key Courses: Web Development, Data Structures, Cloud Computing, DevOps Practices

TECHNICAL SKILLS

- Languages: JavaScript, TypeScript, Python, C++
- Frontend: React, Next.js, Tailwind CSS, HTML5, CSS3, Material UI, Bootstrap
- Backend: Node.js, Express.js, Supabase (PostgreSQL), REST, & real-time events

- Databases: MongoDB, PostgreSQL, MySQL, Firebase
- DevOps & Tools: Git, GitHub/GitLab, CI/CD, Docker, n8n, Stripe
- Ways of Working: Agile/SCRUM, remote collaboration (Teams, Zoom, Trello)

SELECTED PROJECTS

RingMe & Ibritha – Lead Generation Platform

- Built call- and SMS-based lead generation flows with an n8n backend, automating outreach and follow-ups for English and Spanish installations, with clear conversion tracking.

Website & Keyword Monitoring App

- Developed a real-time monitoring system using Vue.js, Express.js, and MongoDB, achieving 99.9% uptime with automated keyword tracking and instant alerts.

Faltz – Real Estate Platform

- Implemented SEO-optimized, responsive Next.js frontend for property listing, renting, and purchasing, including search and filtering for better discovery.

Company Portfolio Websites (Smart Solutions Hub, Startbahn, Aonios)

- Designed and developed modern portfolio sites focused on clarity, performance, and responsiveness, aligned with each brand's goals.

Enterprise Projects (NDA – Banking & University)

- Contributed as a full-stack developer on secure banking and university systems under NDA, working on integrations and production-grade features with strict compliance.

ACHIEVEMENTS

- Completed 15+ solo projects solving real-world problems, from concept to deployment.
- Earned Top Rated Plus status on Upwork, reflecting strong client satisfaction and reliable delivery.
- Consistently achieved A/B grades in core programming and software engineering courses.

LANGUAGES

- English – Professional working proficiency (~90/100)
- Urdu – Native (~100/100)
